

# Qln

*The moments of greatest clarity come when you least expect them, when, in an instant, the truth emerges, simple, clear and instinctively right. In the world of loudspeakers, the arrival of the new Qln speaker is such an occasion.*

*Elegantly engineered in a cool, cosmopolitan design, the Qln speaker reconciles perfectly the demands for high performance and functional style in an innovative and seductive range of visionary solutions.*

## The Signature 3

To reach the soul in music, there are no shortcuts.

Qln is proud to present the new Signature 3 – refined speaker engineering at the pinnacle of a classic 2-way speaker design.

Incorporating over three decades of speaker research, development, design and construction, the Qln Signature 3 carries the legacy of a timeless combination of form and performance re-engineered to provide an unprecedented high-end compact 2-way audio transducer. With truly enticing audio reproduction without any impediment or compromise, the Signature 3 is form and performance in perfect symbiosis and harmony.

The designer's approach and challenge when seeking out to refine the Qln Signature platform was to improve an already eloquent performance in a number of challenging performance areas including further reduction of distortion and increasing presence, timing, timbre, level of detail and micro/macro dynamics, regardless of level, scale and complexity of program material. These endeavours have once again resulted in a timeless and perfected combination of impeccable form and function, offering an uncompromised and unique insight into any program material.

The cabinet construction is based around Qln's unique Qboard® superior damping sandwich technology, structural resonances are eliminated. The bass/mid range and treble drivers have been specifically selected and custom developed by industry renowned Danish driver manufacturer Scan Speak.

*Impedance: 8 ohms  
Amplifier requirements: 25-250 Watt RMS  
Sensitivity: 87 dB SPL 1 Watt 1m  
Low frequency performance: -3dB 42Hz  
Cabinet: Dual density Qboard®  
Terminal: Single wire  
Dimensions (HxWxD): 370x265x365  
Weight: 12,5 kg each  
Finish: Walnut, White satin, natural oiled Oak*
