

Qln

The moments of greatest clarity come when you least expect them, when, in an instant, the truth emerges, simple, clear and instinctively right. In the world of loudspeakers, the arrival of the new Qln speaker is such an occasion.

Elegantly engineered in a cool, cosmopolitan design, the Qln speaker reconciles perfectly the demands for high performance and functional style in an innovative and seductive range of visionary solutions.

Prestige One

Your ears will tell you how right we are.

Qln Prestige One is sharing the same basic DNA as the Iconic Qln Signature speaker. Many of the key elements have been borrowed from our Signature model, like choice of material and technical solutions. The big challenge is to simplify without losing the key elements. Some of the parts were not possible to replace and had to stay, as the unique 7" Kevlar® woofer that have been in use since 1989 and have evolved over the years.

The 7" Kevlar® woofer is the spine of the Qln Prestige One, around which all the surrounding parts are added. This sole component is not the only factor of success, but a very meticulous balance of parts and tuning. All parts have an impact of performance, every material its own character. All parts have to be carefully chosen and their mixture needs to be balanced to make the perfect symbiosis between all involved components.

The bass/mid range and treble drivers have been specifically selected and custom developed by industry renowned Danish driver manufacturer Scan Speak. Crossover is hardwired with Mundorf capacitors and baked air coils to avoid any internal component and filter resonances.

The ultimate goal is to make you listen and enjoy the music, and forget everything else.

*Impedance: 8 ohms
Amplifier requirements: 25-250 Watt RMS
Sensitivity: 87 dB SPL 1 Watt 1m
Low frequency performance: -3dB 48Hz
Cabinet: Simplified 22mm Qboard®
Terminal: WBT Single wire
Dimensions HxWxD): 358x210x260
Weight: 12,0 kg each
Finish: Walnut Piano, Walnut matt, White satin*
