

Qln

Qln is proud to present the new Prestige Three floorstanding speaker.

Based on the classic Qln Signature 3 design, again offering refined speaker engineering at the pinnacle of a classic 2-way speaker design.

Incorporating over four decades of speaker research, development, design and construction, the Qln Prestige Three carries the legacy of a timeless combination of form, function and performance.

Re-engineered to provide an unprecedented high-end 2-way floor-standing audio transducer, presenting truly enticing audio reproduction without any impediment or compromise, packaged in perfect symbiosis and harmony.

The Prestige Three

To reach the soul in music, there are no shortcuts.

The Prestige Three is a 2-way floorstanding design where most of the parts have been sourced from the Qln Signature 3.

A slanted baffle provides perfect time alignment between woofer and tweeter and the truncated pyramid cabinet top with its minimized baffle area suppresses any standing waves inside the cabinet also offering improved 3D imaging.

By again basing the cabinet construction around Qln's unique Qboard® technology, structural resonances are eliminated.

The bass reflex port with its trumpet shape at both ends eliminates air turbulence.

Cabinet is de-coupled from the floor via solid feet with cones and pucks constructed out of hard, high damping materials.

The bass/mid range and treble drivers have been specifically selected and custom developed by industry renowned Danish driver manufacturer Scan Speak and offer the latest in 21st century advanced driver technology.

All parts have one thing in common. Non-resonant behaviour from connector, cables, crossover, speaker drivers through the cabinet with the damping feet. This suppresses disturbing noise, offering more and better dynamics with better silence between the tones thanks to the lower noise floor.

In the Prestige Three nothing is added - just pure music!

Impedance: 8 ohms

Amplifier requirements: 25-250 Watt RMS

Sensitivity: 87 dB SPL 1 Watt 1m

Low frequency performance: -3dB 28Hz

Cabinet: Qboard® Technology

Terminal: Single wire, WBT Nextgen®

Dimensions (HxWxD): 900x210x420mm, with feet 954x310x483

Weight: 27 kg each

Finish: Walnut Piano, Walnut Matt, White satin
